I would suggest Dr. Mary Jane Selgrade at USEPA. I would suggest Dr. Jean Regal at the University of Minnesota and Dr. Michael Luster. Mike has recently retired from NIOSH and is now a consultant. I am sure that you have Drs. Kimber, Basketter and Gerberick as part of the sponsors. I would also suggest Dr. Kimber White from Virginia Commonwealth University, who is our ITOX contractor. Please let me know if you need any additional names. I am not sure if you are looking for government or extramural panelists or both.
